Project Status report

Name:	Mikayla Peterson
Community (UN SD goal):	SDGs 1 and 12
MVP #	1
Sprint cycle dates:	Nov 6 – 17

Project Name	Fairtrade Certification Management System
Blurb	I'm making an application to allow Small Scale Producers to help keep track of the documents they need for Fairtrade Certification. My SDGs are 1 and 12. Since it is critical to keep track of these documents and it can be difficult to navigate the standards document, there is an opportunity to make an application that helps the producers keep create and keep track of these documents as well as specific dates related to the certification process.
For Week Ending	November 17, 2023
Project Status	Red
Status Description	Databinding problems are existing. This not working has been a hindrance to my success.

Activities—During the past sprint cycle

Tried chipping stuff out of my MVP to make something still useful but this is a work in progress. Tried solving my databinding problem and it is... going.... I am not sure why it is being so annoying but it is.

Project Issues

1. Need to finish reducing my MVP
2. Databinding woes. Might need to change how I'm doing this.

Project Changes

N/A - have a proposed MVP change outlined in reflection to be discussed for approval

Activities—Planned for Next Week

1. Finish configuring the data binding
2. Fix the shell display/navigation problem
3. Finish the rest of the MVP1 and work on MVP2

Reflection

I have all of tomorrow off, so I am going to be working on grinding stuff for this and capstone tomorrow and on the weekend. As per usual, I am annoyed/disappointed in myself

- Reprioritize and do the checklist first
- Talk to Cameron about how he's doing it
